CHAPTER 01

About Us

Who we are, where we work and how far we have come since 2017.

IN THIS CHAPTER

Who we are 04

Key facts at a glance 04

Part of the Williot Group 04

01 • WHO WE ARE

Engineering and Construction That Strengthens Communities

Williot Construction and Engineering Limited (WCEL) is a Ghanaian engineering and construction firm. We design, build and supervise projects for private clients, developers, government agencies and multinational companies.

We were first registered in 2017 and fully incorporated in 2019. Since then we have delivered homes, commercial buildings and real estate developments, and taken on infrastructure work, engineering design, urban planning and research.

Most of what we do falls into three areas: construction, water, sanitation and hygiene (WASH), and the environment. Our work so far has been mainly in Ghana. We pay our own way as a company, and we still set time aside for research, training and sharing what we learn.

CHAPTER 02

Vision, Mission & Values

What we are working towards, the values behind it and how we plan to grow.

IN THIS CHAPTER

Our vision and mission	06
Our core values	06
Our strategy for development	07
Sustainable construction	07

02 • WHAT WE STAND FOR

Masters of Consistency and Quality

Our Vision

To become an empowered, self-renewing engineering resource centre with the capacity to meet the national challenge of delivering sustainable development services to all.

01

Our Mission

To support infrastructure development and capacity building through sustainable construction, the management of engineering facilities, and water, sanitation and environmental services, with a particular focus on people in rural areas and low-income urban communities.

02

VALUE 01

Consistency

The same standard on every site, every day, whether the job is a single home or a road network.

VALUE 02

Quality

Sound materials, skilled workmanship and careful supervision, checked at every stage of the build.

VALUE 03

Integrity

Honest pricing, clear reporting and doing what we said we would do, when we said we would do it.

WE BUILD
Mindset

WE BUILD
Character

WE BUILD
The Future

Our focus is infrastructure and services that raise living standards, especially for people in rural areas and low-income urban communities.

02 · OUR STRATEGY FOR DEVELOPMENT

We Aim to Build a Better World

01

Consultancy and Construction First

Our consultancy and construction work comes first. It earns the income that keeps us independent and pays for everything else we do.

02

A Resource Centre for Learning

We give the same weight to building skills and sharing knowledge, in support of development that reaches poorer communities, with a focus on environmental quality.

03

People and Accountability

We keep investing in our staff so we can meet the needs of the sector, and we stay open and accountable to our clients.

04

Civic Awareness

We run non-partisan education and community advocacy on citizens' rights and responsibilities under the constitution and international conventions.

SUSTAINABLE CONSTRUCTION

Five Methods We Build Into Our Work

**Reduce Waste****Recycle****Conserve Energy****Green Buildings****Sustainable Resources**

IN PRACTICE

What you will find in the homes we build

- 20 kW solar power systems
- Rainwater harvesting systems
- Smart lighting and motion sensors
- Tesla Powerwall battery storage
- 10,000-litre water storage
- Electric vehicle charging points

03

CHAPTER 03

Our Services

Three sectors and nine specialist services, from design through to maintenance.

IN THIS CHAPTER

Commercial construction	09
Residential construction	09
Infrastructure	09
Specialist services	10

03 · BUILDING IS WHAT WE DO

Three Sectors, One Standard

**SECTOR 01**

Commercial

Mixed-use developments, corporate offices and retail spaces. We combine construction with programme management so that complex commercial jobs meet the brief and finish on time and within budget.

[Mixed-use](#)[Corporate offices](#)[Retail](#)**SECTOR 02**

Residential

Homes for owners and developers. We handle everything from site preparation, concrete and masonry to interior finishes, and we plan each home to save its owner money over its lifetime.

[Private homes](#)[Estates](#)[Smart homes](#)**SECTOR 03**

Infrastructure

Roads, bridges, dams, pipelines, ports and railways. We work with government agencies and multinational companies to design, build and maintain infrastructure on schedule and within budget, without lowering our operating standards.

[Roads](#)[Bridges](#)[Dams & pipelines](#)[Ports & rail](#)

03 · SPECIALIST SERVICES

Nine Services Under One Roof

Clients can bring us in for a single service or for the whole project. Either way, one team is responsible for the result.

01 Design & Build

Commercial and residential buildings taken from concept design through to handover under a single contract.

02 Road Construction & Maintenance

Structural and geometric road design, highway construction, surface dressing, asphalt and concrete paving, road marking and signs.

03 Bridge Construction

Bridges and crossings designed and built as part of wider road and infrastructure schemes.

04 Refurbishment & Retrofitting

Upgrading existing buildings with new technology to cut energy use and running costs, and bringing their finishes up to date.

05 Project Management & Value Engineering

Clear goals, milestones and contingency plans, and a close look at cost at every stage to remove what the project does not need.

06 Construction Material Supplies

Iron and steel, cement, glass, stone and more for contractors, engineers and architects, with quality materials at fair prices.

07 Scaffolding

Safe, efficient scaffolding put up by a qualified, experienced team and planned around the needs of each site.

08 Equipment & Haulage Hire

Construction equipment and our own fleet of Williot tipper trucks, available for projects of any size.

09 WASH & Environmental Engineering

Water supply, sanitation and hygiene (WASH) projects and environmental work that protect the health of the communities we serve, particularly in rural and low-income urban areas.

We manage every stage of your project, from the first idea to completion, on time and within budget.

04

CHAPTER 04

How We Work

A clear process, our own people on site and our own trucks on the road.

IN THIS CHAPTER

Our six-stage process 12

Our people 13

Williot Trucks 13

04 · OUR PROCESS

From Your Idea to Handover in Six Stages

Every project follows the same path, so you always know what happens next. The first two stages cost you nothing.

STAGE

01

Consultation **FREE**

You tell us about your idea and we sit down to talk it through: the site, the budget, the timeline and what you want from the finished building.

STAGE

02

Quotation & Presentation **FREE**

We prepare a detailed quotation and present our proposal to you, so you can see exactly what you are paying for before you commit.

STAGE

03

Signing of Contract

Once you are happy with the proposal, we sign the contract and agree the programme of works.

STAGE

04

Construction

Our team builds, fabricates and supervises the work on site, and keeps you updated as each milestone is reached.

STAGE

05

Handover

When the work is complete, we hand the finished project over to you.

STAGE

06

Defect Liability Period

We stay with you after handover and put right anything that needs attention during the defect liability period.

Every stage leads to the same place: a client who is happy with the result.

04 • OUR PEOPLE AND PLANT

Our Own People, Our Own Trucks

WILLIOT TRUCKS

Materials Arrive When the Programme Needs Them

We run our own fleet of Williot tipper trucks. Owning our haulage means sand, stone and spoil move on our schedule, not on the schedule of a hired driver.

The fleet is also available to hire, alongside our construction equipment, for other contractors' projects.

05 • FEATURED PROJECT

The Wilmer

A Smart, Self-Powered Family Home

EAST LEGON HILLS, ACCRA • RESIDENTIAL

The Wilmer is a five-bedroom luxury home with two swimming pools, a home cinema and its own gym. The house runs on Alexa smart-home automation and stores its own power in a 20 kW Tesla Powerwall.

Water is looked after on site too, with a rainwater harvesting system and 10,000 litres of storage. It shows the kind of home we like to build: comfortable to live in and cheaper to run.

KEY FEATURES

- 5 en-suite bedrooms
- 7 bathrooms
- 2 swimming pools
- Gym
- 20 kW Tesla Powerwall
- Smart home automation
- Gazebo and outhouse
- 3 living areas
- 3 kitchens
- Home cinema
- Home office
- Tesla car charging
- Rainwater harvesting
- Security post

05 • COMPLETED PROJECTS

Homes We Have Delivered

Lake Drive Avenue

📍 East Legon Hills, Accra

A four-bedroom home with a swimming pool and fountain, powered by 20 kW of solar energy with Tesla Powerwall storage.

4 en-suite bedrooms

6 bathrooms

Pool & fountain

Gym

Alexa automation

COMPLETED

Waterfront Development

📍 East Legon Hills, Accra

Three four-bedroom units with a pool and a full-floor master suite that looks out over a calm waterfront.

COMPLETED

4-Bedroom Building

📍 Tema Community 25

A four-bedroom, en-suite family home with generous living space and landscaped grounds.

COMPLETED

3-Bedroom Building

📍 East Legon Hills, Accra

Three en-suite bedrooms, fitted closets and a kitchen furnished with smart appliances.

COMPLETED

4-Bedroom Residential Building

📍 East Legon Hills, Accra

A second-floor master suite with views of the water and the Tema Motorway.

05 • FURTHER COMPLETED PROJECTS

More Homes We Have Delivered

Soba Residences

📍 East Legon Hills, Accra

Two minutes' drive from Borteyman Stadium, close to the Tema to Accra Motorway and an artificial lake.

4 en-suite bedrooms

Pool & fountain

Smart lighting

Alexa automation

The Desiderata

📍 Adjiriganor, Trassaco

Four en-suite bedrooms, two pools, a 20 kW Tesla Powerwall and rainwater harvesting.

Cecil Crescent

📍 Lake Side Estate

Four-bedroom homes with a home office, gym, pool and smart-home automation.

No. 1 Lusso Close

📍 Katamanso, Accra

A three-bedroom home in a quiet neighbourhood, close to Accra's business and shopping districts.

No. 1 Beulah Lane

📍 Lake Side Estate

A four-bedroom home with a pool, gym, solar power and Powerwall storage.

Projects listed above have been completed and handed over to clients.
